- Chen's Note taken on [\[2019-01-19 Sat 10:37\]](#) \\

\*[what is an Affero licence?Why Affero]

-software in the cloud --> no distribution/conveying --> will not trigger the normal copyleft

-regarded as a loophole

-Affero GPL closes this loophole (even you host your software as , this will trigger copyleft)

\* Developers that use the GNU GPL protect your rights with **\*two steps\***:

- Chen's Note taken on [\[2019-01-19 Sat 10:02\]](#) \\
- two steps:
- (1) assert copyright [GPL does not abandon CR]
- (2) license this program

(1) **\*assert copyright on the software\***, and (2) **\*offer you this License\***  
giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.
